DETAILED ACTION

1. All outstanding rejections are overcome by applicants' amendment filed 7/1/03.

The following rejection is necessitated by applicants' amendment and thus, the following action is final.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldner et al. (U.S. 5,721,018).

Goldner et al. disclose coating composition comprising acrylic resin which has hydroxyl number of 30-200, number average molecular weight of 1,000-10,000, and glass transition temperature of -20 to 75 °C wherein the acrylic resin is obtained from acrylic monomers having OH group and other monomers, polyisocyanate wherein the ratio of isocyanate to hydroxyl group in the acrylic resin is at least 2, catalyst, pigment wherein the ratio of pigment to resin solids is 0.05-1.2, and polyurethane dispersion or emulsion. It is disclosed that the acrylic resin and polyurethane emulsion are present in ratio of 95:5 to 5:95. There is also disclosed a coating method wherein the surface to be coated is first coated with primer, followed by coating with the above composition, followed by application of topcoat (col. 1, lines 56-66, col. 2, lines 6-23 and 30-50, col. 3, lines 6-14, col. 7, line 66-col. 8, line 9, col. 12, lines 44-46, 54-60, and 66-67).

It is noted that Goldner et al. disclose number average molecular weight (M_n) while the present claims require weight average molecular weight (M_w). However, given the relationship between M_n and M_w , i.e. $M_w/M_n > 1$, it is clear that the weight average molecular weight will inherently overlap the weight average molecular weight as presently claimed.

In light of the above, it is clear that Goldner et al. anticipate the present claims.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
